

# A - Arithmetic Progression Editorial

by en\_translator

Simply put, the problem asks to print integers starting from  $A$ , incrementing by  $D$ , up to  $B$ . One can implement it by appropriately using a for statement or a while statement.

Sample code (C++)

```
#include <bits/stdc++.h>
using namespace std;
int main(){
    int a, b, d;
5.  cin >> a >> b >> d;
    for(int n=a; n<=b; n+=d){
        cout << n << (n==b?'\n':' ');
    }
}
```

Copy

Sample code (Python)

```
A,B,D = map(int,input().split())
print(*range(A,B+1,D))
```

Copy
